Dresden, 2023-02-20

Online Event: Pyroelectric Detectors in Action 2023

Practical demonstration on setup and configuration of infrared detectors

In theory, the functioning of a pyroelectric detector is absolutely comprehensible. As the centrepiece in gas analysers, flame sensors, spectral analysis devices as well as non-contact temperature measurement, it measures gas concentrations, detects flames and helps in the analysis of substance compositions. But how exactly can users integrate their infrared detectors into their measuring solution themselves?

Our experts answer this question in the upcoming online event "Pyroelectric Detectors in Action". In a practical demonstration, they use a digital PyriQ® detector to illustrate how users start with the measurement setup and determine the appropriate parameters for their pyroelectric detectors. In addition, the participants will get an overview of the variety of pyroelectric detectors as well as the possible fields of application.

During the event, the experts from InfraTec will answer all questions in a personal live exchange. You too can experience the world of infrared detectors in a lively way.

Online Event

"Pyroelectric Detectors in Action"

Date: Tuesday, 4 April 2023 / Time: 02:00 PM – 04:00 PM (CEST)

Practical Presentations

"Easy Start-up – Using a PyriQ® Detector with Digital Interface"

Robert Herre, Product Management of Sensor Division

"Custom-tailored to Your Application – Configuration of Pyroelectric PyriQ® Detectors"

Dominic Plache, Product Management of Sensor Division

Registration: <https://register.gotowebinar.com/register/1811827366335692381?source=PR>

Information: 1.608 characters (incl. spaces)

About InfraTec

The InfraTec infrared sensor and measurement technology company was founded in 1991 and has its headquarters in Dresden, Germany. The privately held company employs more than 240 employees and has its own design, manufacturing and distribution capabilities.

The infrared sensor division produces custom-made components on more than 1.600 m² of clean room space – especially pyroelectrical infrared detectors – for clients worldwide. The product range includes analogue single and multi-channel detectors as well as digital multi-channel detectors (PyriQ). The detectors are used, for example, in gas analysis, fire and flame sensors and spectroscopy.

Press Release

InfraTec GmbH Infrarotsensorik und Messtechnik

With its infrared measurement business unit, InfraTec is one of the leading suppliers of commercial thermal imaging technology. In addition to the high-end camera series ImageIR® and the VarioCAM® High Definition series, InfraTec offers turnkey thermographic automation solutions e. g. for industry processes, non-destructive testing and fire detection and prevention.
